

CURRICULUM VITAE

Name: Rosalba Parenti

Place and Date of birth: Catania, December 23-1965

Present address:
Department of Bio-Medical Sciences,
Section of Physiology.
University of Catania,
V.le Andrea Doria, 6 Catania 95125
Phone +39-95-7384034
Fax +39-95-7384217
E-mail: parenti@unict.it

Actual position:

- Professor of Physiology at the Department of Bio-Medical Sciences, Section of Physiology, University of Catania.
- Supervisor animal research of the University of Catania.
- Member of Institutional animal care and use committee (I.A.C.U.C.)
- Regional Supervisor (Sicilia) of the European Biomedical Research Association (EBRA)
- Member of the PhD in Biotechnology
- Member of Academic Senate

Education:

- April 1989: Advanced degree in Pharmacy, University of Catania.
- May 1989: Qualification for the practice of the profession of chemist.
- October 1995: PhD in "Neurosciences" University of L'Aquila.
- July 1996: Assistant Professor of Physiology (BIO/09), School of Pharmacy, University of Catania, Italy.
- December 2003: Associate Professor of Physiology (BIO/09), University of Catania.
- From October 2008 to October 2009: Vice-Director of the Department of Physiological Sciences.
- From October 2009 to December 2010 Director of the Department of Physiological Sciences

Research experience:

- 1994: Ecole Normale Supérieure. Développement et évolution du système nerveux, Equipe atypique niveau 3. CNRS URA. Paris.
- 1996: Universidad de Sevilla. Departamento de Ciencias Morfológicas.
- 1998: International Institute of Genetic and Biophysics. CNR, Napoli.
- 2005-2007: Functional Genomic Center. Institute of Neurological Sciences. CNR, Catania.
- 1987 to present: Department of Physiological Science (now: Department of Bio-Medical Sciences, Section of Physiology) University of Catania.

Scientific Interests:

Anatomo-functional organization of the SNC. Development of the SNC. Gap-Junctions intercellular communication. Functional role of genes involved in the development of the SNC. Functional role of genes involved in neurodegeneration. Apoptosis. Experimental cancer models to study antitumoral therapies. Cancer. Drug delivery.

Scientific Competences:

Neuroanatomy. Molecular Biology. Electrophysiology. Neuroanatomy. Cellular Physiology. Molecular Biology. Genomic and Proteomic

Actual Funding:

“Il recettore per la transferrina di tipo I: un potenziale biomarker per nuove strategie diagnostiche e terapeutiche nei tumori della tiroide”. PRIN 2008.

“Allestimento di modelli sperimentali di xenotripianto di cellule staminali neoplastiche umane, utili per lo studio delle terapie antitumorali” Scientific agreement between “Casa di Cura Musumeci – Gecas” and Department of Physiological Sciences.

Teaching Activities:

Prof Rosalba Parenti plays her teaching activities in the University of Catania, Italy.

From 1996 to present teaching activities have been so developed:

From AA 1996-97: Assistant activities to official courses

From AA 1999-to present: Teaching of Physiology for the Faculty of Pharmacy.

From AA 2000-to present: Teaching of Biology for the Faculty of Pharmacy.
